

The screenshot displays the Visual Studio Code (VS Code) editor interface. The main editor window shows a CSS file named `style.css` with the following content:

```

159 .card-custom: hover .card-custom-image img {
160   transform: scale(1.1);
161 }
162
163
164 /* CONTACTS */
165 #contacts .form-control {
166   background-color: var(--color-base);
167   border-color: var(--color-base);
168   color: var(--color-body);
169 }
170
171 #contacts .form-control: focus {
172   border-color: var(--color-brand);
173   box-shadow: none;
174 }
175
176 #contacts .form-control: placeholder {
177   color: var(--color-body);
178 }
179
180 #contacts input .form-control {
181   height: 40px;
182 }
183
184 /* SOCIAL ICONS */
185
186
187 .social-icons a {
188   width: 40px;
189   height: 40px;
190   display: inline-flex;
191   align-items: center;
192   justify-content: center;
193   background-color: var(--color-base2);
194   border-radius: 100px;
195   font-size: 24px;
196 }

```

The editor interface includes a sidebar on the left with the File Explorer, Search, and Source Control views. The bottom status bar shows the current file path, line and column numbers (Ln 23, Col 4), and various settings like Spaces, UTF-8, and CSS. The system tray at the bottom indicates the date and time (11:43 pm) and the language (ENG).
